

Our Toyota HiAce Refrigerated Van delivers on all fronts

Toyota HiAce gives you the quality and power you need

The Toyota HiAce Refrigerated Van is a rear-wheel drive 5-door with 2 seats, powered by a 2.8L diesel turbo 4 cylinder engine that has 130 kW of power (at 3400 rpm) and 450 Nm of torque (at 1600 rpm) via a 6 Speed Auto Sequential. The Toyota HiAce Refrigerated Van LWB uses 8.2L/100km of diesel in the combined city and highway cycle. The Toyota HiAce Refrigerated Van comes with more comfort and more technology than ever before. In addition, improved safety features will help protect you and your payload.

Thermo King V-300 MAX provides you with smart, efficient cooling

The Toyota HiAce Refrigerated Van is equipped with a Thermo King V-300 MAX series unit, perfect for fresh, frozen, and deep-frozen applications. The unit operates via the vehicle's engine, with electric standby. The user friendly in-cab display allows you the flexibility for specific transport applications. With built-in alarm codes, you can quickly identify any anomalies.

Thermaxx's unique experience delivers the thermal efficiency in the van market

With over 4 decades in the refrigerated transport industry, we know how to build thermal efficient truck bodies, as demonstrated in our range of Thermaxx Refrigerated Truck Bodies.

Our customers have driven our growth through shared knowledge, which has told us that a quality refrigerated van was needed in Australia. Welcome to the Toyota HiAce Refrigerated Van. With all our know-how, we have built a quality refrigerated van that will maintain temperature and meet the demanding needs of the refrigerated transport industry.
